

AGILE Testing Performance

Performance & Testing

AGILE Chair is built to the most stringent performance and quality testing protocols .

These stringent protocols have been deployed throughout the design and manufacturing stages of the product namely

- Design phase
- Developmental phase
- Production/Manufacturing
- Shipping & Packaging

to ensure high quality products for our customers

*Images depicted of testing machines are for representative purpose only and close to current equipment under which product have been tested by Godrej Interio

AGILE Testing Performance

Tests Performed on AGILE CHAIR
