

FLORA

Attractive . Supportive

Flora is workstation chair range meant to address the needs of users who seek style and ingenuity in their workspace. Flora is an ergonomically designed chair requiring minimum adjustments and controls. The chair's petal shaped contours engulf the user's body, there by providing immediate comfort. The see-through net back option not only aids in better ventilation but also harmonizes the chair with its surrounding environment, making it visually lighter.

Unique arm rest fixing at the rear end of the seat offers you freedom to take suitable posture and move freely when seated. Arm rest stays with you during recline ensures continuous support to your fore arms.

Not a mere working tool, the Flora chair promises the pleasure of perfect sitting comfort. It has minimum of technical elements and maximum ergonomics while remaining an attractive item of décor for any office.

Flora Ergonomic Adjustments

A. Adjustable Neck rest

(Only for cushion back variant)

- Grasp the neck rest and move up or down to adjust the height to meet your preferred level.

B. Arm Height Adjustment

- Push button to adjust the height of arm.

C. Seat Height and upright locking

- Lift lever, sit down to lower and stand up to raise seat height
- Push lever in to lock back in upright position.

D. Recline tension Adjustment

- Turn lock clockwise to tighten recline tension.
- Turn lock anti clockwise to loosen recline tension.

All the models except the visitor chair comes with a centre tilt mechanism with upright lock. The arrangement is very intuitive, simple to operate and easy to access control knobs. The back can be locked in upright posture to support the user's activities like leaning on the table for reading, writing or working on a computer.
