Target Segment

MNCs

vodafone

Microsoft

Corporates

GVK

bharti

PSUs

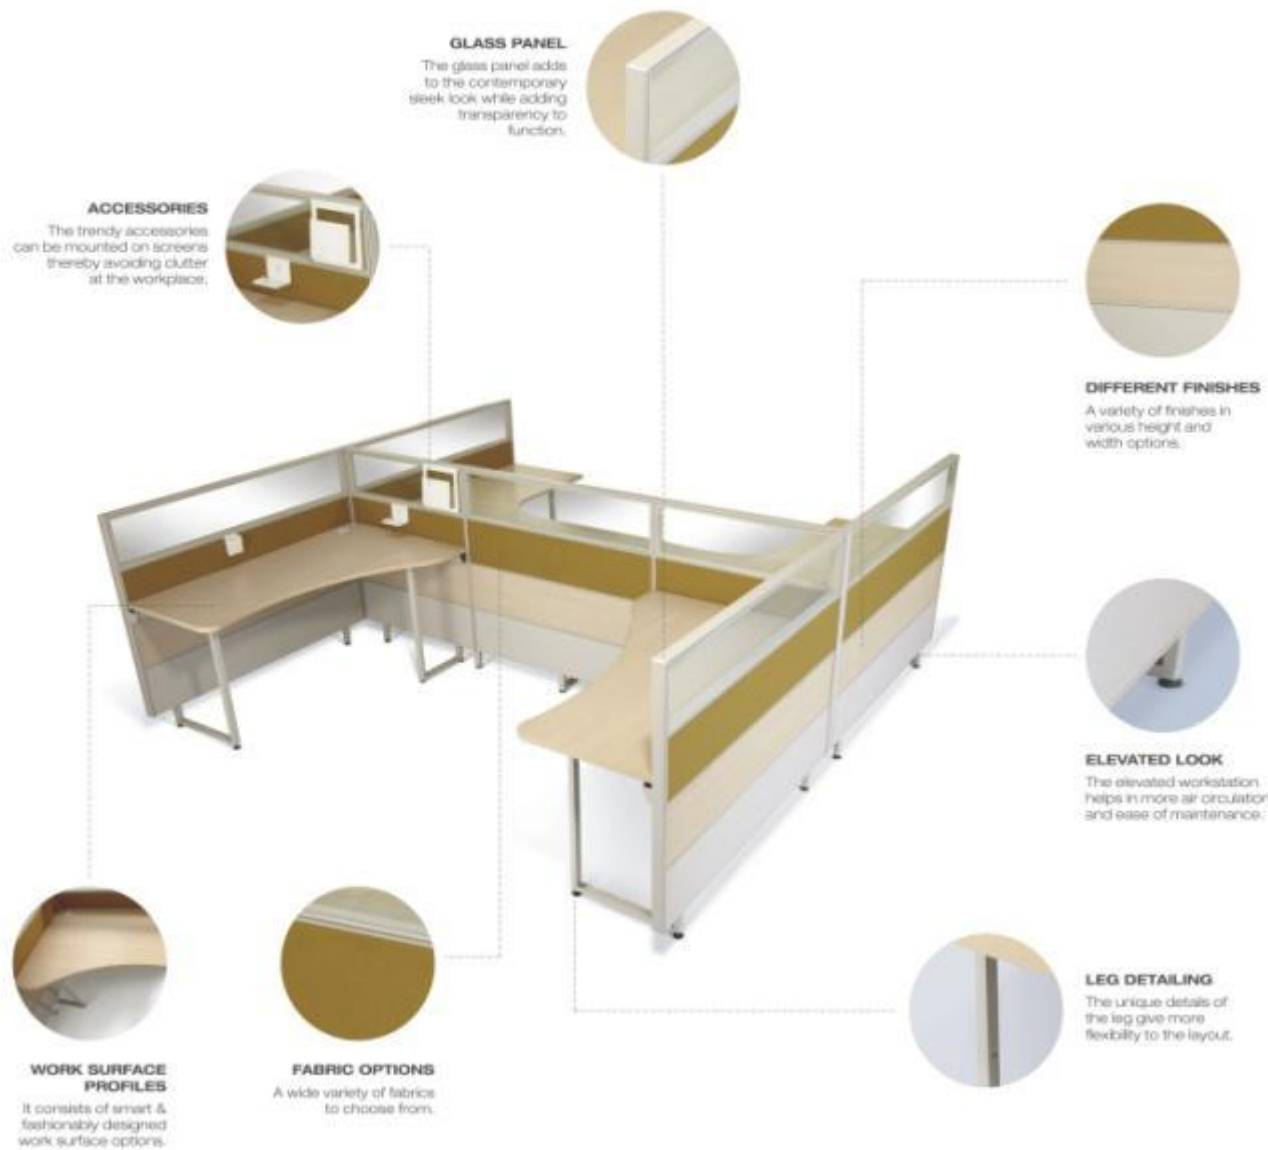

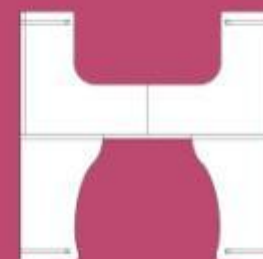

SLIM IS STURDY

'Slim' is a modular panel based system that manages to look slim yet strong. Its gapless partition system with linear panels gives it a more contemporary look. The Slim range offers regular workstation configurations for office working areas as well as cabin modules that can provide you with some space for yourself and can accommodate a few visitors. Slender yet powerful, this truly ground-breaking design is definitely here to stay.

STYLISH AND STRONG

WISH MODULES

FEATURES

Good fit & finish of the assembled panel due to 'frame' design of trim extrusions

The monotonous image of partition system is broken by -A gap at the bottom of the panel giving it an elevated look. Also This gap also helps in improving the air circulation and natural light penetration (by reflecting from floor) in the office

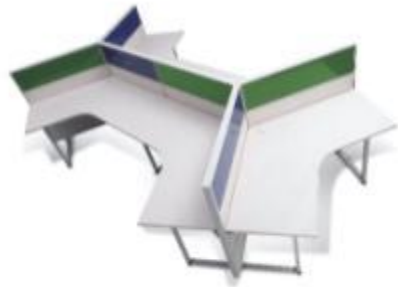

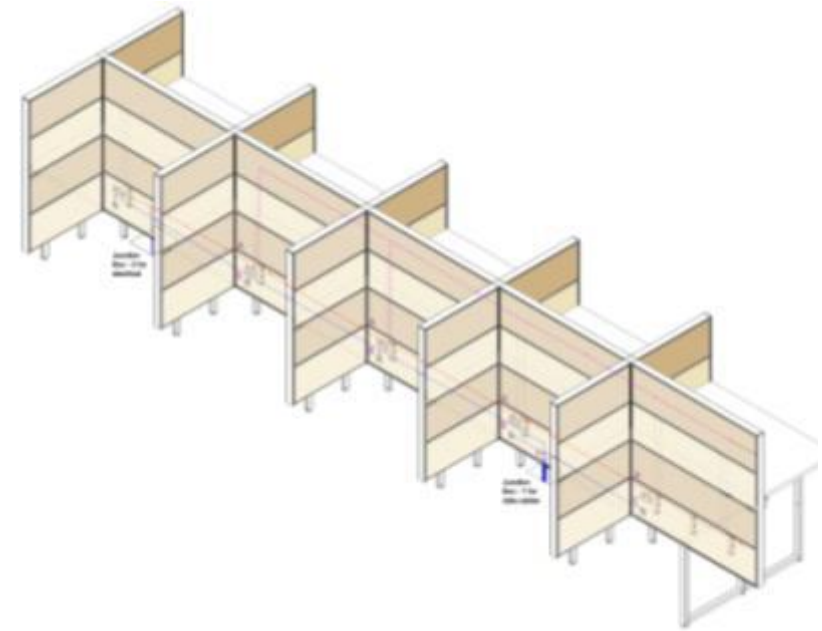

FEATURES

Cable management for cables at 2 levels through the partitions

Ease of cable management like tile based systems due to snap on tiles at the bottom & slide in tiles at the top of the module of the screen

Various Configurations possible - in linear, 90 degrees & 120 degrees possible

FEATURES

Unique leg detailing- makes the product look like desk based system

The Top tile is slid in with options like Double Glass tile with thin framing members
Other options like Fabric, Fabric Tack able are also available.

Switch mounting directly on bottom tile eliminates the metal raceway

Various Height available - Heights of 3', 4', 4.5' & 5' as well as 3.5' (for recent Green Building requirements)

MATERIAL FINISHES

All pre laminate shades and metal shades of the NS1 shade range* can be offered for the workstation.

Laminates for the Middle two blocks to be offered from Merino shades.

Fabric from the Masterstrokes of Life shade card can be offer for screens.

* As per the latest updated in COTS
