

## PULSE Performance Testing

### Performance & Testing

PULSE Chair of Family is built to the most stringent performance and quality testing protocols practiced in the industry

These stringent protocols have been deployed throughout the design and manufacturing stages of the product namely

- Design phase
- Developmental phase
- Production/Manufacturing
- Shipping & Packaging

to ensure high quality products for our customers

\*Images depicted of testing machines are for representative purpose only and close to current equipment under which product have been tested by Godrej Interio
