

UNWIND

godrej interio

PRODUCT FEATURES

Unwind- café chair

Unwind- with Arms

Unwind- with Desklet & storage

Unwind- 3 seater on
beam

- The tapering back profile gives ample lower back support and gives freedom for arm movement. The seat and back are made from injection molded plastic engineered to perfection offering rigidity for performance and **enough flexibility for comfort.**
- The optimal scale of the product makes it **comfortable for all user types.**

The arms provide optimal elbow support apt for a multi-purpose chair and are more useful in ingress-egress (**Available in only with armrest variant**)

Feature of chair **stack-ability** as well as **inverse placement** over table is good for applications such as cafeterias where the floor needs to be cleaned on regular basis

(Available in with and without arm variants only. Stack only 4 chairs)

The desklet is depth adjustable supporting ergonomic writing posture for all body types. **(Available in desklet variant)**

The desklet version come with a wire basket below the seat to enable storage of books / stationary. **(Available in desklet variant)**

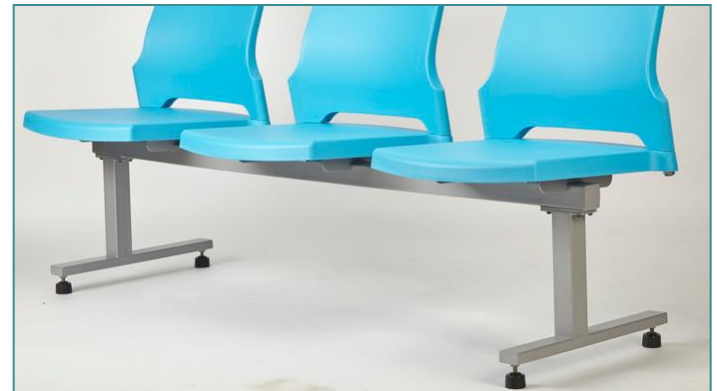

The absence of narrow grooves and ribs, typically seen in plastic shells, **makes it easy for maintenance**

The injection moulded side edging in the desklet component in the chair for training application make it more durable and less prone to mis-use. **(Available in desklet variant)**

A robust welded and powder-coated frame of MS is the support structure **(Beam seating variant)**

A **retro-fit cushioned upholstery cover** is optional to add to the comfort for applications requiring longer time of seating and not needing the stack feature.

PRODUCT CONSTRUCTION

- The **seat and back are made from injection moulded plastic** engineered to perfection offering rigidity for performance and enough flexibility for comfort.
- The chair parts are **UV stabilized** as required for indoor applications to reduce colour fading effect.
- A **robust welded** and powder-coated frame of MS is the support structure of the chair.
- **Felt stickers** are stuck on the under-side of stackable chairs to reduce scratch marks.
- The desklet offers smooth movement through **injection moulded parts reducing the play and scratching** of powder-coating as typically seen in metal brackets.
