

We as humans are always looking for quick Answers to our problems. When we start to feel **uncomfortable** in our work station it is natural to first think of things you can upgrade or replace to minimize your **discomfort**. Many people attribute back related pains and strains to **inadequate seating** and get it in their head that buying a fancy new ergonomic chair will make them more comfortable and productive. In most instances, this is correct. Most workstation chairs you buy may not adequate for daily use and a more **advanced chair** may very well reduce your symptoms and **solve your dilemma**.

However, in some cases your situation may need to be looked at from a different angle To **save yourself**, time and energy. The chair **carefully conceived** to provide a complete solution and **acknowledged challenges** of seating posed in work environments around the world today. Versa a full range of **ergonomic adjustments** are provided in chair. Through the **clarity and simplicity** of this chair's functionality and performance, **VERSA chair** is another chair in our collection that display common sense with all that's required from an **work station chair for today**.

VERSA

Versa mesh and fabric upholstered versions have been designed with an ergonomic contour to provide form - fitting lumbar support ensuring comfort and healthy seating.

MESH BACK is made of breathable polyester, has an ideal tension that provides comfortable lumbar support for extended use.

Healthy seating – enhanced further with the air circulation provided by the mesh's unique design and an easy-to-clean surface.

FULLY UPHOLSTERED fabric back is constructed well thought-out with extensively researched ergonomic contour, giving the back the desired comfort. The thin profile is designed for long hours of healthy seating.

VERSA

In any work environment, the keys to getting things done are control and comfort. The VERSA chair allows you to customize the fit of the chair to your body type and posture.

SEAT DEPTH ADJUSTMENT feature allows the seat to be adjusted in a forward or backward position. This enables you to derive long-term comfort while performing multi role tasks.

The ACTIVEBIO SYNCHRO MECHANISM has an automatic back tilt tension adjustment which is based on a user's body weight. The seat 'glide' function during tilting ensures proper lower back support and encourages healthy seating posture. The mechanism allows limiting the tilt at 5 different positions.

VERSA

Versa's intuitive design

The back and armrest do not employ buttons or levers, to make adjustments quick and perceptible. To make adjustments, just grab the arm pad or back shell and lift to unlock. Slide into desired position and release.

HEIGHT ADJUSTABLE BACK for cushion as well as mesh back versions to align with curve of your back. Adjustments can be done in the range of 7.40cm.

HEIGHT ADJUSTABLE ARMS for personalized arm support. Wide PU top arms for firm support of arms while performing any task. Height-adjustable up to 6.5cm in 5 steps.

VERSA

Our endeavor is to provide products which are not just the best in performance, but also safe and minimize the impact on our environment.
