TRANSFORM YOUR LIFE

TRENDY **FURNITURE** FOR STYLISH OFFICES

Welcome to a range of office furniture that's all set to take the corporate market by storm. Say hello to the 'S-series' - a range of smart furniture all set to outclass its closest competitors on all fronts - be it colour, contour, design, ergonomics or features.

The 'S-series' range of office furniture from Godrej Interio will soon be the hallmark of design and set the standards for future modern office furniture trends.

Flexible enough to fit in present and future needs, customizable to the extent that it can be said to have been tailor-made, and with a variety of systems to choose from - out of a large range of possibilities, the design characteristics of this collection is set to break the mould when it comes to modern office furniture systems.

SLENDER

SLENDER is an aesthetically appealing high performance frame-and-tile office furniture system, designed to support fast-changing organizations and accommodate new work styles & office environments as the company evolves.

Workstations can be quickly installed and reconfigured without disruption of work or office systems. A clerical workstation can become a managerial workplace with minimal additional components.

Tiles are available in a wide range of materials and finishes, including pinnable fabric, tempered glass or acrylic (clear, frosted and vision stripes), polycarbonate, writing board, embossed steel and perforated steel.

Work surfaces may be selected with MFC and HPL finishes, in solid colours and wood grain patterns, in a variety of ergonomic layouts.

Backing all this, is a compendium of storage solutions from fixed and mobile pedestals, storage cabinets with a range of heights and enclosures, to high density storage solutions.

The accessory rail can easily take the load of a LCD with monitor support, paper management trays, telephone trays and blinder boxes with full horizontal adjustment.

SLENDER also features a sophisticated cable management system that is fully concealed inside the frame, delivering power, data and voice with full separation around the workstation cluster.

STYLE

STYLE is a thin panel office furniture system, combining the aesthetics of thin panel, with the strength and performance of a standard width panel system. It features an oval post with vertical load bearing slotted track, to carry cantilever work surfaces without deflection.

Panels can be arranged to fill down to the floor, or the lower panel may be omitted to facilitate air circulation.

Panels are available in a wide range of materials and finishes, including pinnable fabrics, tempered glass or acrylic (clear, frosted, and vision stripes), polycarbonate, embossed steel and perforated steel.

The panels are load bearing and strong enough to support a fully loaded tambour fronted Overhead Storage Unit (OSU) as well as open shelving.

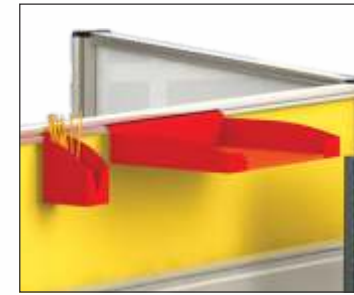

The OSU and open shelving is horizontal and fully adjustable, as are the range of accessories such as paper management trays, telephone trays and binder boxes.

STYLE features a sophisticated cable management system that is face mounted, with riser and horizontal trunking, delivering power, data and voice with full separation around the workstation cluster.

SLEEK

SLEEK is a high performance desking system, that can be used standalone or in clusters of two or more. It is also available with a height adjustable worktop, with "sit to stand" adjustability, enabling the user to work sitting down or standing up, at the correct ergonomic height for the individual.

SLEEK also features best in class cable management, with a high capacity cable running through the length of the desk top. Users have "plug and play" immediate access, with power, data and voice outlets and cable dump concealed below the worktop flap. Accessories such as paper management, telephone trays, transaction tops and binder trays can be mounted at any point horizontally along the beam, allowing shared use of resources.

Visual privacy can be tailored to both - the organization as well as user's needs, by lite screens mounted above and below the worktop. The lite screens are available with a wide variety of finishes including pinnable fabric and magnetic writing board. Lite screens also feature a horizontal top track, allowing accessories full lateral adjustability.

Worktops are available in a wide range of sizes with rectangular and corner worksurface configurations, with MFC and HPL as standard finishes with a flat edge. Custom sizes, shapes finishes and edge details are also available.
