Godrej interio

WORK IN HARMONY WITH THE ENVIRONMENT.

WE'RE WORKING TOWARDS A GREENER FUTURE.

At Godrej, one of India's pioneering green organizations, we take the responsibility of creating awareness and initiating concrete steps to ensure the survival of our planet.

These initiatives involve incorporating simple processes in the way we work, that can make a big difference to the world in which we live and its future.

Talk green.
Walk green.

MAKING A PHILOSOPHY WORK...

Philosophy is the guiding principle which shapes, develops and prompts the actions and initiatives of an organization. At Godrej, our environmental policies are deeply entrenched in a simple philosophy of 'Walk the Talk'.

Living a philosophy is the only way to make it work. Therefore, at Godrej, 'Walking our Green Talk' means conserving and maintaining 1750 acres of mangroves in Mumbai, giving a new lease of life to different species of mangroves, animals, birds, reptiles and water creatures. On the other hand, it also means tie-ups with organizations like CII-Green Business Centre to promote awareness and development of Green Buildings in India. Not surprisingly, these efforts have fetched us the National Green Governance Award in 2005. Only recently in February 2011, Godrej Bhavan was awarded the Gold Certification under USGBC under the Existing Building Category.

The bar of green compliance is raised further by designing and following manufacturing programs and processes which actually mitigate ill effects of planet threatening factors like deforestation and pollution. As a corporate policy, Green Performance is important for each and every function of the organization and forms a critical part of our assessment tools.

The commitment of 'Walking the Green Talk' has been taken forward in our products, with a focused drive to manufacture products with lesser environment footprint. A task achieved by pioneering efforts in designing less environment burdening products, usage of eco-friendly materials and setting up of less polluting processes. All our actions clearly goes to enumerate that we practice, what we preach.

GREENER PRODUCTS – THE NEED OF THE HOUR

The only way to salvage a greener future is by using eco-friendly products that support a commitment to protect the environment.

As the country's leading producer of contemporary furniture, Godrej Interio shoulders this responsibility by inculcating green initiatives that are inbuilt into all the processes that go into the sourcing, manufacturing, usage and disposal of our products.

Our furniture paves the way for this by ensuring highly reduced levels of indoor air pollutants through careful choice of material and manufacturing processes.

Our latest innovations can be seen in our Green Series, comprising five product platforms namely Stallion Green, Spacio Green, Vurv Green, Linea Green and Unite Green.

GREENGUARD® Indoor Air Quality Certified

Our pioneering green efforts and practices won us global recognition in 2009 when we became the first Indian company to receive the US based **GREENGUARD** Certification for Stallion Green, Spacio Green and Unite Green. Only recently in 2010, we added Vurv Green and Linea Green to this range.

What makes our products green:

- Maximum use of wood substitutes like particle boards and medium density fibre boards
- Use of recycled / recyclable packing material
- High steel content to improve durability and life span of product
- Easy to disassemble, reconfigure and refurbish for reuse
- Use of low-emitting materials; materials not polluting the indoor air
- Modular design ensuring use of minimum basic components to make various designs
- Minimalist designs ensuring minimum material usage

INDIA'S FIRST CERTIFIED **GREEN** RANGE

Staying true to the Godrej mission to conserve the environment, Godrej Interio can boast of a wide range of green products designed by them comprising of tile based systems, desk based systems and storages that meet the varied needs of customers. We are further committed to continue adding to this range ensuring the Godrej motto remains alive.

GREEN PROCEDURES

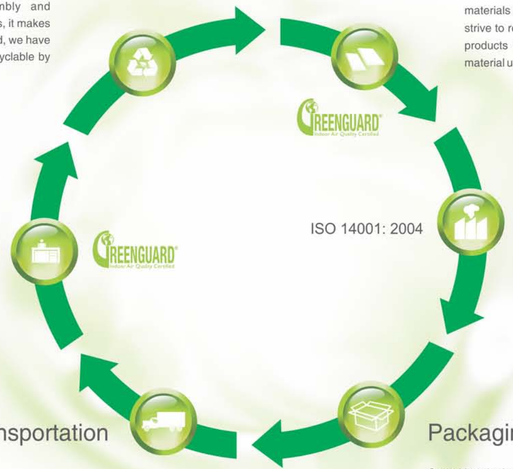
LIFE CYCLE ASSESSMENT

End of Life

Finally, we ensure all good things come to a new beginning. With the easy disassembly and reconfiguration, using common hand tools, it makes it easier to refurbish for re-use. To this end, we have designed our products to be 60-80% recyclable by weight.

Materials

Godrej Interio practices its green beliefs by favouring recycled materials and refusing hazardous materials. This is evident in our products, which are built from around 10% recycled materials and low-emitting materials. To be minimalist, we strive to reduce the number of components and weight of our products for added compactness. This reduces our overall material usage and also ensures easier assembly.



In Use

Life is precious. Hence our green products ensure greener living through better indoor air quality and consequently improved occupant health and productivity. Our products are designed to prolong lifespan with parts that can be added or replaced. Besides, we also provide useful maintenance information to promote their longevity.

Manufacturing

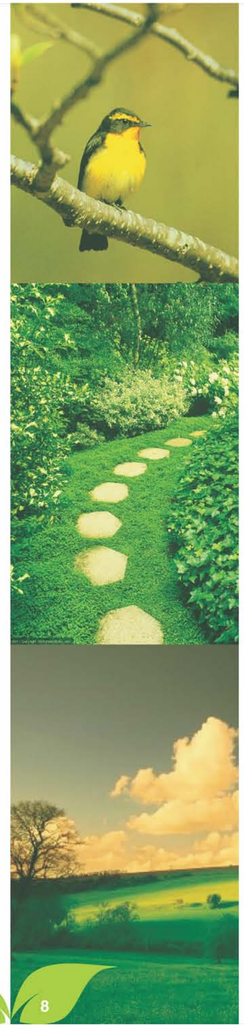
Our stance on environmental issues are evident in our manufacturing plants, which are fitted for low-impact manufacturing. For this, our product site at Vikhroli, Mumbai was awarded ISO 14001 certification in 1998, a first in the Indian furniture industry. Using these processes, our products are designed and made with minimal wastage, energy consumption and environmental impact.

Transportation

In our quest to save energy at every step, we didn't overlook transportation. The reduced weight of our products and the minimal volume packaging due to knock-down design ensures less energy is needed for moving them. This consequently reduces automobile pollution. We have introduced a knock-down design for almost all our products.

Packaging

Godrej Interio doesn't stop at that. We're careful about packaging too. That's why our packaging is done with recycled/recyclable paper without which a needless waste would ensue. All the materials we use such as cardboard and fitments, are suitable for recycling.



Materials

- Use of low-emitting GREENGUARD compliant materials
- No hazardous materials like chrome, mercury and lead
- Use of wood substitutes like particle boards and medium density fiber boards.
- Use of steel for durability

Manufacturing

- Use of natural lighting in plant
- Use of power saving techniques and processes
- Use of VOC & heavy metal free powder coating process
- Sale of hazardous waste to authorized parties

Packaging

- Use of recycled / recyclable packing material

Transportation

- Knockdown design reducing product volume by 70%, thereby saving transportation fuel and related carbon emissions.

In Use

- GREENGUARD Certified products for better indoor air quality
- Use of durable materials help stretch life span of product
- AMC by company for longer and more efficient use of the product

End of Life

- Easy assembly, disassembly and reconfiguration, making it possible to refurbish for re-use

Stallion Green

Enriching the environment while enhancing performance, Stallion is a green workstation that helps you do just that. Designed to be sturdy, its strong lines and bright aesthetics make workspaces livelier. Its impact on the environment is as minimized as its impact on your performance is maximized.

Rounded aluminum trims

Sturdy panels

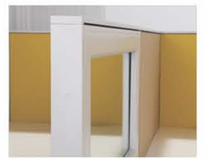
- Overall thickness of partitions is a sturdy 69mm
- Removable fascia allowing for an easy to change look and feel of the workspace
- Range of tile heights can be given without disturbing the existing installation
- Standardized tile sizes that allow mixing and matching for a more personalized look
- Various worktop profiles, worksurface edge options, tile options, sizes, colours and finishes available
- Panel mounted accessories to do away with the muddle on your worktop
- Extensive wire management for neat under table spaces

Specialized materials and processes to ensure healthy indoors Designed for longer life span leading to lesser impact on environment
Robust design of the panels aids in frequent reconfiguration and resource reuse

Spacio Green

Optimize space by adding décor to your office atmosphere – and let the environment breathe easy with Spacio. It is elegant and functional, created from environment-friendly materials and procedures. Even its sleekness stems from the efficient use of materials which is kept to a bare minimum – the perfect way to harmonize your work with your world.

Flat aluminum trims



Sleek panels

- Overall thickness of partitions is only 53mm giving a sleek aesthetic look and also optimizing space
- Removable skins allowing for an easy to change look and feel of the workspace
- Range of tile heights can be given without disturbing the existing installation
- Standardized tile sizes that allow mixing and matching for a more personalized look
- Various worktop profiles, worksurface edge options, tile options, sizes, colours and finishes
- Panel mounted accessories to do away with the muddle on your worktop
- Concealed wire management for neat under table spaces

Specialized materials and processes to ensure healthy indoors Optimum material usage without compromising on the functionality
Sleek design aids in saving floor space

Vurv Green

Created from environment-friendly materials and processes, Vurv is a unique desk based system that redefines the 'art of working' in the truest sense. With its flexible and seamless design, Vurv is the ultimate green solution. It brings a new lease of life into your work lifestyle.

Trendy side storage

Flamboyant aesthetics

Trendy contoured panels

- Slim desk based system provides a sense of aesthetics at the workplace
- Movable partition screens and return units make it flexible and adaptable to changing work patterns
- Modern and linear geometry adds youthful energy to the workstation
- Vertebrae for concealed wire management keeps the area under the workstation neat
- A variety of configurations and finishes are available providing a wide choice to the customers

Specialized materials and processes to ensure healthy indoors The flexible elements like return units, divider screens aids in multiple usage of given space Conscience design effort to optimize material usage

Linea Green

Designed to look effortless yet perform a tremendous amount of work, Linea is India's first GREENGUARD Certified modular desk based system. It creates an open and interactive atmosphere at the workplace thereby enhancing your performance. Sleek and attractive, Linea has proven to be a true friend to the environment.

Sleek desk based system

Split screens

Floating look

- Its sleek and simple desk based system creates a more interactive workspace
- The floating worktop gives a feeling of elevation & also prevents bending of electrical cables while travelling from one workstation to another
- The split screens give a more open look and allow more interaction among co-workers
- Provision for two different finishes is available increasing the utility value of the vertical surface
- The switch access flap gives easy access to the switches on the workstation
- Slim and compact wire trays make the work area look less cluttered

Specialized materials and processes to ensure healthy indoors · Designed with minimal material content · Extensive use of mild steel with recycled content · Open design of furniture aids free flow of light & air

Unite Green

Flexing its configuration to fit your needs, here is a green solution to all your space-consuming storage problems. Unite Green is smart and modular – with a soft corner for the environment. It provides the flexibility that space-crunched offices crave, and it can mix, match and stretch to fit your storage anywhere. Truly a friend of the environment that adapts to meet your expectations.

Serves as partition

Several configurations

Adjustable shelves

- Modular storage design that facilitates various workstation configurations
- Used for dual purpose of partitioning and storage
- Horizontal and vertical stacking facilitates different storage configurations as per your need
- Reverse stacking ensures access from both sides
- Front and back available in a variety of finishes
- Provision of rollers at bottom skirting facilitates mobility in loaded conditions
- Available in number of sizes leading to numerous combinations

- Specialized materials and processes to ensure healthy indoors
- Serves as a substitute to a workstation panel aiding in material reduction and space saving

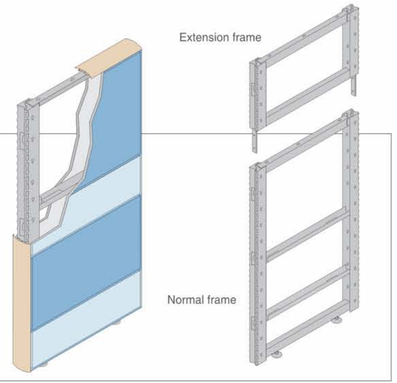
Partition Panels Frames

Normal Frames:
Width: min 300mm - max 1200mm
Height: min 784mm - max 1981mm

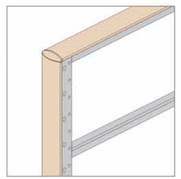
Additional Normal Frames:
Width: 1350mm & 1500mm
Height: 1089mm,1241mm,1394mm

Extension Frames:
Width: min 300mm - max 1500mm
Height: 306mm, 458mm, 611mm



Partition Panels Trims

The panels are finished with aluminum trims which are available in both curved & flat profile.



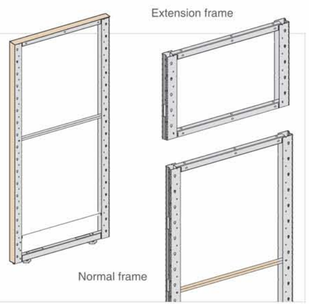
SPACIO

Partition Panels Frames

Normal Frames:
Width: min 300mm - max 1200mm
Height: min 784mm - max 1981mm

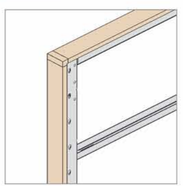
Additional Normal Frames:
Width: 1350mm & 1500mm
Height: 1089mm,1241mm,1394mm
Extension Frames:
Width: min 300mm - max 1500mm
Height: 306mm, 458mm, 611mm
(Extendable up to 1650mm in combinations given below

1050mm NF + 600mm EF
1200mm NF + 450mm EF
1350mm NF + 300mm EF



Partition Panels Trims

Aluminum power coated flat trim which defines system slimness.

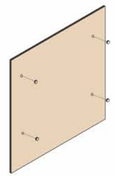


PRODUCT FEATURES - STALLION / SPACIO

Partition Panels Tiles

- Laminated, Fabric, Tackable, Plain Metal, Perforated Metal Tile, White Board, Glass writing board
- Clear glass, Frosted Glass, Poly Carbonate Sheet

Sizes-
Width: min 300mm - max 1200mm
Height: min 300mm - max 750mm

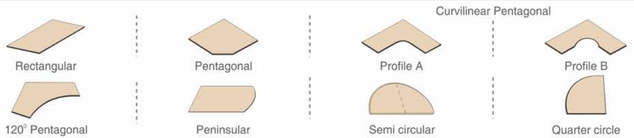


Laminated tile

Glass tile

Work Surface

Width: min 450mm - max 1800mm
Depth: min 450mm - max 750mm
Edge Profile: PVC Edge banded
: 'T' Edge banded
: Postform Edge*
Postform edge can be provided only for Rectangular & Pentagonal worksurfaces.



Storages

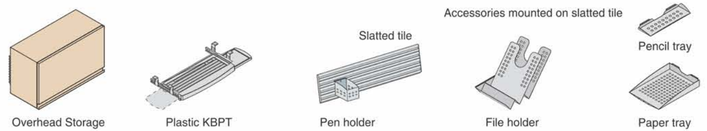
Nova Drawer Unit Range
Drawer Configuration:
- 1 Box drawer + 1 Filing drawer
- 2 Box drawers + 1 Filing drawer
- 4 Eq. Box drawers

Drawer Front Finish:
- Metal front • Wooden Post form front
- Wooden PVC edge-banded front

Accessories

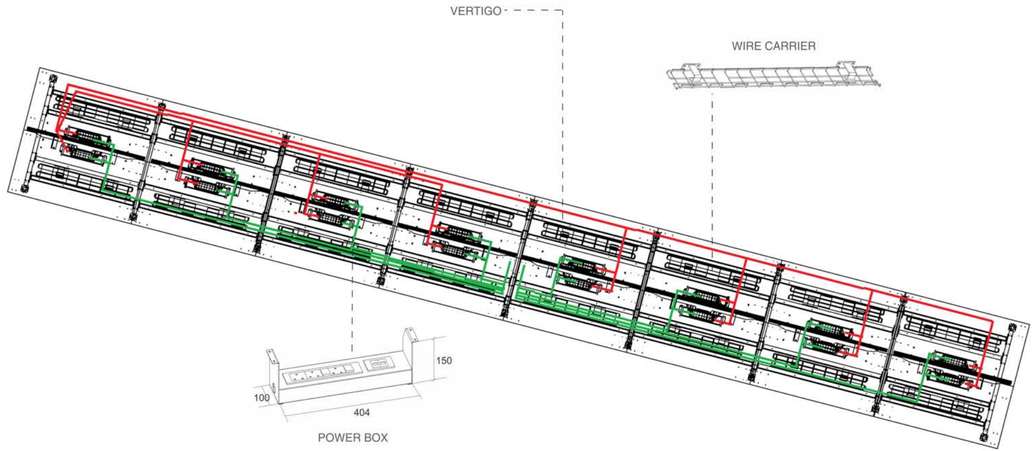
Overhead Storage Unit
(Mounted on panel only)
Height: 450mm
Depth: 350mm
Widh: 600mm to 1200mm

Other accessories:
- Plastic Key Board Tray
- Panel Mounted Accessories



WIRE MANAGEMENT - VURV

The wire carrier allows for proper guiding of the wires thereby providing a clean and neat look to the workspace with ease of maintenance and safety. The defined facility for mounting of the switches on the power box under the work surface gives a clean look to the workstation. Wires are drawn up from the floor junction box through the vertigo and then guided through the meshed wire carriers. Termination of wires and mounting of switches is available on the power box assembly hung below the work surface. The routing of wires from the switch board up to the gadgets placed above the table top is through the slot provided at the back of the workstation thereby reducing clutter on the workstation. The plugs on the power box can be accessed easily via the flap provided with each workstation.

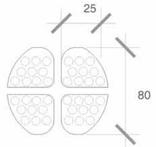


Electrical Wires

Data Cables

*Note: The wires are carried from the junction box to the wire tray via a snake wire carrier / vertical wire duct.

Wire carrying capacity of the Vertigo - Detail 'A'

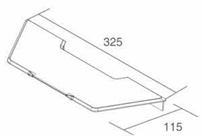


40 numbers of data wire of 6mm diameter can be drawn through one Vertigo

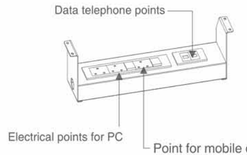
Wire carrying capacity of the wire carrier - Detail 'B'

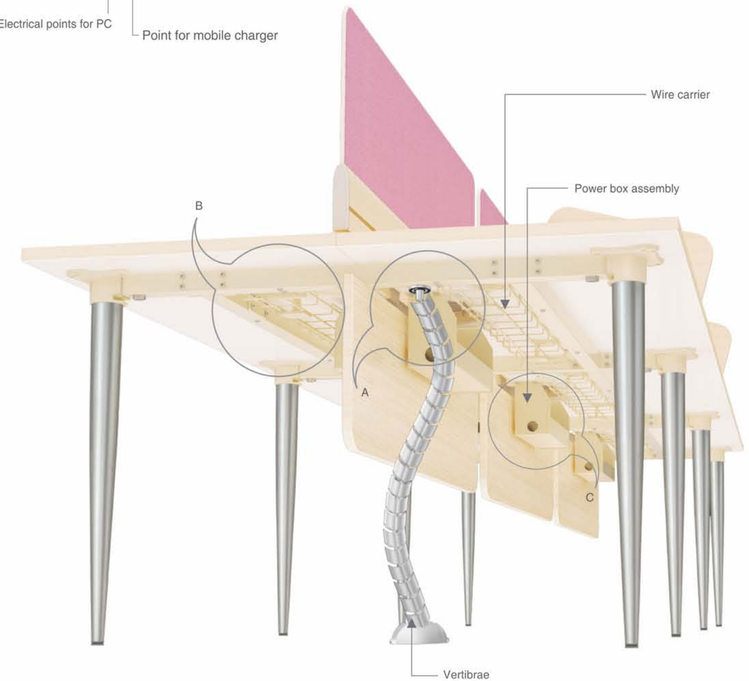
40 numbers of data wire of 6mm diameter can be drawn through the wire carrier

Access Flap Provided on Worktop



Power box - Detail 'C'





PRODUCT FEATURES - VURV

Legs

Features :
- Tapered leg shaft in M. S. and the leg joinery is made of pressure die cast aluminum alloy
- Leg shaft is powder coated

Size:
- Height: 700mm

Cross Members

Features :
- M. S square tubes provided for connectivity with longitudinal members and worktop
- M. S. Square tubes are of powder coated finish

Size:
- Available for workstation depth: 600mm, 750mm, 1200mm and 1500mm

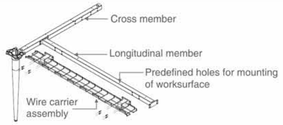
Connectivity to the cross members.

Connectivity to the longitudinal members

Longitudinal Members

Features :
- Integrates with leg assembly and cross members to form the understructure of the work surface
- Provides additional stability to the worktop

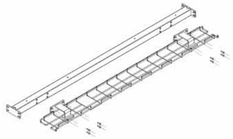
Size:
- For work surface widths: 1050mm, 1200mm, 1350mm, 1500mm, 1650mm and 1800mm



Wire Carriers

Features :
- To carry data and electrical wires through the length of the workstation cluster

Size:
- Cross sectional dimensions: Width - 120mm, Height - 45mm,
- For work surface widths: 1050mm, 1200mm, 1350mm, 1500mm, 1650mm and 1800mm



Screen Extrusion

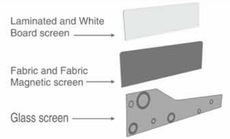
Features :
- Anchors the screens to the worktop
- Anchorage for movable elements like divider panel, return unit and accessory tray
- Single extrusion up to 3600mm can be provided for bench-type work clusters

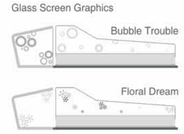
Size :
- Width - 30mm, Height - 120mm

Screens

Features :
- Screens provide sitting privacy, display of papers and messages for screen mounted accessories
- The low height enhances openness, interaction and teaming in the office environment

Size :
- Available in: Glass, Fabric, Fabric Magnetic and Laminated
- All the screens are about 8 to 9.5mm in thickness
- For work surface widths: 1050mm, 1200mm, 1350mm, 1500mm, 1650mm and 1800mm

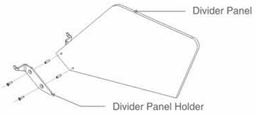




Divider Panel

Features :
- Aids in demarcation of work area and provides privacy
- Movability feature enhances the openness, teaming and dynamism in the office environment
- Panels available only in laminated finish with thickness of 18mm

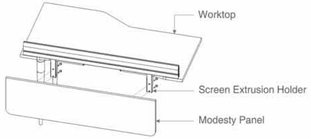
Size:
- For workstation depth- 600mm, height 2- 264mm, height 1- 350mm, width- 579mm



Modesty Panel

Features :
- Provides privacy below the work surface
- Laminated panels are finished with PVC edge banding

Size :
- Panel thickness: 18mm
- For work surface widths: 1050mm, 1200mm, 1350mm, 1500mm, 1650mm and 1800mm



PRODUCT FEATURES - VURV

Worksurface

Features :
- Linear geometry and ergonomic profiles available in single piece
- Profiles available: linear worksurface, linear profiled work surface,120° worksurface
- Laminated worksurface is finished with PVC Edge banding

Size:
- Thickness - 25mm

Linear Worksurface

Size: depth- 600mm,750mm
Worksurface widths: 1050mm,1200mm, 1350mm,1500mm, 1650mm,1800mm

Linear Profiled Worksurface

Size: depth 1- 600mm, depth 2- 750mm
Worksurface widths: 1050mm, 1200mm, 1350mm, 1500mm, 1650mm,1800mm

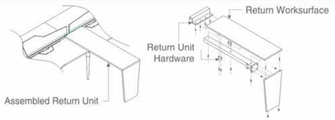
120° Worksurface

Size: depth- 600mm
Worksurface widths: 1200mm

Return Unit Assembly

Features :
- Additional ancillary workspace or informal discussion spaces
- Workstation and gable end made of laminated particle board finished with PVC Edge banding

Size:
- Worktop depth - 450mm, Worktop length - 1500mm
- Workstation thickness - 25mm, Workstation height - 780mm



Angular Storages

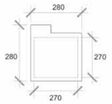
Features :
- Provides for storage of active files and items of day to day usage

Size:
- Depth: 380mm, height: 461mm
- Lengths for single side workstation: 600mm, 750mm
- Lengths for double side workstation: 1200mm, 1500mm

Accessories

Features :
- Magnetic white board hooked on the screen

Size:
- 270mm x 280mm



White board hung on the screen

Storages

Nova Drawer Unit Range

Drawer Configuration : upto 497mm height freestanding, max depth 590mm
- 1 Box drawer + 1 Filing drawer
- 3 Eq. Box drawer

Drawer Front Finish : Metal Front

Drawer unit range : upto 646mm height freestanding, max depth 440mm
- 2 Box Drawer + 1 Filing drawer
- 4Eq. Box drawer

Drawer Front Finish : Metal Front

Freestanding

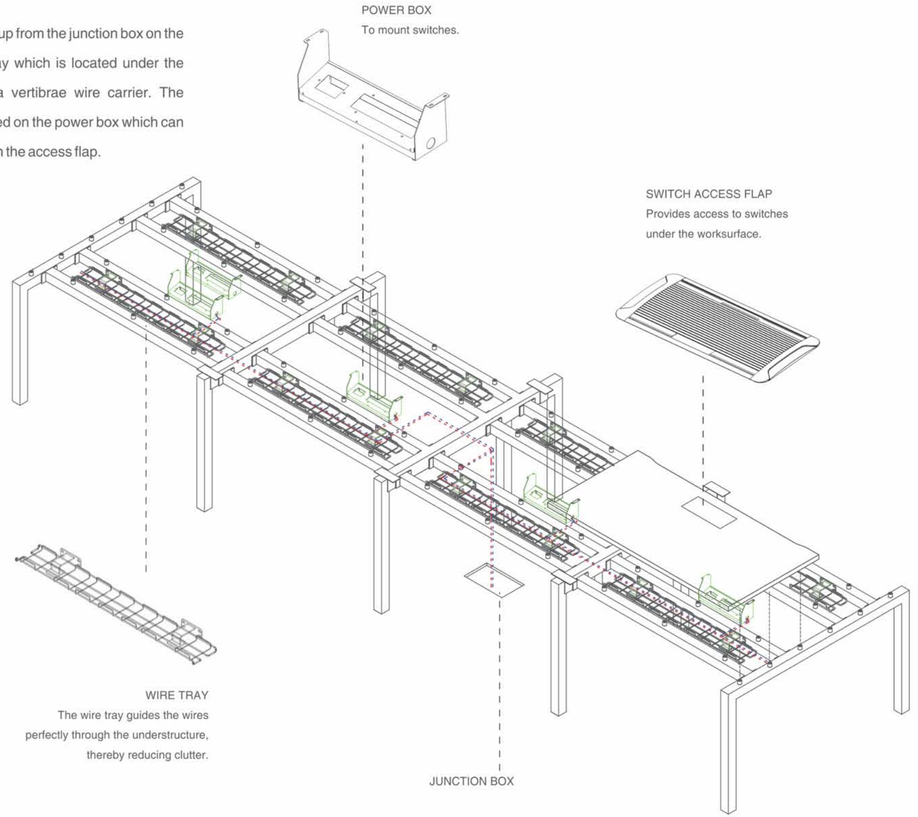
4 Dr mobile pedestal with metal front

WIRE MANAGEMENT - LINEA

The wires are taken up from the junction box on the floor, to the wire tray which is located under the work surface, via a vertibrae wire carrier. The switches are mounted on the power box which can be accessed through the access flap.



*Note: The wires are carried from the junction box to the wire tray via a snake wire carrier / vertical wire duct.

PRODUCT FEATURES - LINEA

Understructure

Leg Finish:
• Metal powder coated

Main Leg and Shared Leg Size:
• Single- 450mm, 600mm, 750mm widths

Main Leg and Shared Leg Size:
• Double- 900mm, 1200mm, 1500mm

Partition Screens

• Plain Screen: Fabric, Fabric Magnetic, Laminated
• Framed Screen: Fabric, Fabric Magnetic, Laminated, White Board
Twin Finish Framed Screen: Fabric + Fabric, Fabric + Laminated, Fabric + WhiteBoard, Laminated + Whiteboard, Laminated + Laminated (Fabric could also be Fabric Magnetic)
• Screen width: 600mm, 750mm, 900mm, 1050mm, 1200mm, 1350mm, 1500mm
• Height: 492mm, 642mm
• Screen thickness: 18mm to 20mm for Plain Screen, 23mm for Framed Screen

Worksurface

• Edge Profile: PVC Edge banded

Size:
• Width: min 900mm - max 1800mm
• Depth: min 450mm - max 1500mm
