

A white door with two vertical silver handles. The door is slightly ajar, revealing a dark interior. The handles are positioned symmetrically on either side of the door's center.

Probably the last time you'll open the door this way.

Close doors on conventional doors
that occupy **space,**
unnecessarily.

Presenting tambour door units

The world is moving faster. Day by day people are expected to be more efficient. Utility, convenience & flexibility have become the key jargons for every organization. A storage unit plays an important role in augmenting work efficiency.

Gone are the days where people use to spend lazy time searching for a file and block a larger area with the doors open.

The time has come to open the doors to a whole lot of convenience with Godrej Tambour Door Units. Unlike the conventional ones, these doors slide inside as you open them. They are more aesthetic and offer optimum space utilization. They look elegant and block zero space giving the storage a new lease of life.

Maximizing the Benefits

Tambour Door Units offer a unique and economical way to incorporate space saving features into your storage systems. It simply rolls in sideways, never taking floor space away from the owner. They can be left open while you are working without getting 'bumped into' or knocked close. Easy sliding and the shutters roll in completely and therefore full freedom.
